ONLY **\$37.48** PER FLAT RATE HOUR**

# Facilities and Services

## **DID YOU KNOW THAT NMSU HAS A FULL SERVICE VEHICLE REPAIR FACILITY ON CAMPUS?**

Hello, I would like the opportunity to inform you of an important service that is available to all departments that utilize NMSU owned vehicles. Our Vehicle Mechanic shop at Facilities & Services can work on all vehicles including golf carts and utility vehicles.

In my visits around campus, the statement I hear most is, "I did not know about your shop" or "We did not know your shop could work on our vehicles." We are a full service shop that can, and will, service any NMSU vehicle that comes our way. We handle basic oil changes, tires, brakes, and engine and transmission repairs. These concerns are not a problem for us.

All repairs performed are warrantied on parts and labor for 1 year. We will not suggest any services that are not recommended by the manufacturer of your vehicle as other repair shops do.

Electronics drive the vehicles of today: from engine controls to anti-lock brakes and air bags. We can service issues with these systems as well.

Have you priced labor rates from a dealership lately? I can tell you that most, if not all are over \$125.00 per flat rate hour. How about an independent shop? I doubt you will find any independent shops under \$90.00 per flat rate hour!

Our Facilities and Services Vehicle Mechanic shop labor rate is \$37.48 per flat rate hour. There is no mark up on parts. We will bill any parts needed to repair your vehicle to your department at our cost. Can your budget benefit from these savings? A low labor rate, no mark up on parts, and you are supporting your University at the same time. Why would you go anywhere else without considering the benefits of using the NMSU Vehicle Mechanic shop?

Now take into account lost, unproductive staff time to take the vehicle into town and wait for completion of services or shuttle back to campus. Let's not forget that you have to go back and pick it up when ready. We can pick up your vehicle and deliver right back to you when finished. No lost productivity for you or your staff.

Thank you for your time and consideration. Please contact me with any questions or concerns you may have concerning vehicle maintenance and repairs at 646-7868.

Paul Crouch, Vehicle Mechanic Shop Supervisor
